Office of the
Dy.Minister for Agri.. & Forests
Fort,
Bombay: May 29, 1952

Shri S. R. Kanthi, B.A.,LL.B. Deputy Speaker, Bombay Legislative Assembly was here yesterday.

He comes from.Ilkal, Dist: Bijapur. H.M., R. and A. & F.D. was requested by him to lay the foundation stone of the Power House of Electric Grid Scheme of the Government of Bombay. H.M., R. and A.& F. has agreed and given a tentative date between 15th and 20th of June. Shri Kanthi had discussions with the officer-in-charge of the Grid Scheme. It is said that it would be possible to arrange the foundation.

The below copy of matter in Kannada script is sent for being encarved in the foundation stone. It is hoped necessary arrangements for the functions are made.

Below Government P. W. D. U. O. R.

dated 30th May, 1952.

ELECTRIC GRID OFFICES.

With reference to the U.O.R. of 30th May 1952 to this office in connection with the H. M.,R. and A. & F.'s proposed visit to Ilkal for laying the corner stone of the Power Station Building, an estimate for the masonry work and the inscribed slab, amounting to Rs. 200/- is enclosed herewith for perusal and sanction. Cost can be met from contingencies of the work.

It is pointed out that the above estimate does not include the cost of other necessary items in connection with the reception of the Honourable Minister, which, I am informed by Shri S.R. Kanthi, will be arranged by him with the help of the local people as was suggested by him on the previous occasion when he had made a similar proposal last year.

As time is short, order for the slab to be placed in advance.

The Minister In-Charge Revenue, Agriculture and Forest,

Ladies and Gentlemen

On behalf of the Electric Grid Department I have great pleasure in welcoming you on this occasion of laying corner stone of the Power Station Building which is going to generate and supply electricity to this part of the Bijapur District.

The present scheme for supply of power to this town and to the adjacent town of Kamatgi forms a part of the Bombay Government's Diesel Nursery Programme. This programme contemplates the installation of small Power Stations in areas beyond the economic reach of the major Grid Schemes at present. Townships with 2000 dwelling houses and having prospects of cottage industries and irrigation pumping are included for development under this programme. Power Stations have already been constructed and put into commission at four towns viz., Ratnagiri, Chiplun, Vengurla and Malvan in Ratnagiri District and one, viz., Islampur Peth in Satara District. Similarly five power schemes are now under construction, viz., Dharangaon in East Khandesh, Hukeri and Bailhongal in Belgaum District, Guledgud and Ilkal in Bijapur District.

I hope you will be interested to know a few salient features of this electric supply scheme for Ilkal.

You might be aware that Ilkal and the surrounding villages of Hungund, Amingad, Sulebhavi and Gudur, embracing an area of about one square mile with the population of about 40,000, will be benefited by the supply from this Ilkal Power Station. The capacity of the station is 400 KW consisting of three generating sets which will generate at 440 volts, 3 phase, A.C. 50 cycle supply. The town itself will be supplied for lighting at 230 volts and power at 440 volts and for the supply of places far away from the power station such as Hungund, the voltage will be stepped up to 11,000 volts by means of transformers and transmitted

by means of overhead lines to the surrounding villages, where it will again be stepped down to the distributing voltages of 230 and 440 volts. There will be a total length of about 24 miles of overhead lines erected for this purpose. The rates chargeable will be the most economical, i.e., just to meet the various expenses in the generation and distribution of electricity, which, however, owing to the present high cost of diesel oil will be higher than what it might otherwise have been. We hope, the price levels would soon come down to enable a reduction soon after we commence supply from the station.

We have had to encounter various difficulties in commencing this scheme. There were difficulties about acquisition of land, procurement of material and plants like copper conductors, insulators, poles, iron and steel requirements, etc., many of which, at the present moment, are articles in short supply in the world markets as many countries are busy with re-armament and other large schemes of development and rehabilitation to improve the lot of the common man. The present scheme is expected to cost about Rs. 12,65,000 and we hope to commence supply by October 1953. Power will be supplied primarily for small industries like flour mills, power looms, cinemas, etc. and for agricultural pumping and also for lighting.

I have to offer my thanks to the Minister for accepting our invitation and for giving his consent to lay the corner stone and I have to thank you for accepting our invitation and gracing the occasion by your presence.

Ladies and Gentlemen, with these few words I request the Hon'ble Minister to lay the corner stone of this power station building.

At the request of Shri S. R. Kanthi, Dy. Speaker, Bombay Legislative Assembly, who comes from Ilkal, Dist. Bijapur, the Minister for Revenue, Agriculture and Forest has agreed to lay on the 20-6-52 the corner stone of the Ilkal Power House of the Electric Grid. The Kannada script on p. 1 ante is to be engraved on the Foundation Stone. Govt has approved an estimate of Rs. 200/- for the proposed masonry work and the inscribed slab. An address to be read by the Executive Engr, Shri R-M. Karandikar on the above occasion will be found on pp. 13-14 ante and is submtd for inform.

Subject:- Diesel Electric plant and machinery for power stations at Dharangaon, Nakeri, Guledgud, Ilkal and Bailhongal - Payment of bills for the -

.....

I have to state that orders for supply of Diesel Electric plant and machinery for the above noted power houses were placed with Messrs. Turner Morre and Company,Limited, Bombay in the year 1950. The orders placed were governed by the "General Conditions of Contract for plant, machinery manufacture equipment and electrical Works" of Government, at Bombay. According to the terms of contract, the suppliers were entitled to receive 80% of F.O.R. contract value of any portion of the plant and ~~xxxx~~ materials from time to time delivered F.O.R. Part machinery ordered for Guledgud and Ilkal power houses were received in Bombay during January 1952, but as the power stations were not ready to receive them, the consignments could not be despatched to work sites. The suppliers were therefore requested to store them in their godowns at Bombay till such time sufficient covered space was available at site for their safe storage. They agreed to this arrangement without any extra charges to Government on account of storage, insurance etc. The civil works having since been completed and sufficient covered space being available for storage of machinery, the suppliers have been advised to despatch the materials to work sites. In the meanwhile the suppliers sent their bills requesting for payment of 80% of the value of materials actually received as required by conditions of ~~xx~~ contract. As explained above the non-despatch of materials to sites was not due to any delay or fault on the part of suppliers, the firm was not prepared to bear heavy financial load. Under the circumstances it was not considered fair to either withhold or delay full payment till the materials were despatched and received at site. I have therefore made an overall payment to the extent of about 50% only (reduced payment) so as to keep to the conditions as far as possible and also utilise funds allotted for these works during 1951-52 which otherwise would have lapsed. The balance payment would be made to them only after the materials are delivered ~~xxxx~~ correct.....

correct and in good condition at work sites. Since this payment was virtually a deviation from the general terms of payment, it is requested that Government sanction to it may kindly be obtained and communicated to regularise the payment. The action of making payment in anticipation of Government approval may also kindly be got approved in view of the circumstances explained above.

2. Since the above, some more machinery for Dharmagaon, Kukdi and Bailhongal power houses has been received in Bombay. In this case too the power houses in question are not in a position to receive the materials as there is no sufficient covered space available for its safe storage against theft, fire, ruin etc. The suppliers have therefore agreed to store it in their godowns at Bombay till the conditions at site warrant their despatch. The suppliers have sent their bills for total amount of Rs.188,778/- representing 80% of the F.O.B. price, for payment. For similar reasons as stated in the ~~xx~~ preceding para, reduced payment to the extent of 80% of F.O.B. price i.e. Rs.117986/- may be paid to them. The balance 30% will be made afterwards when the materials are actually delivered correct and in ~~xx~~ good condition at work sites. Since this will be a deviation from the general conditions of contract, it is requested that necessary approval of Government on above and 80% payment on bills that may be received hereafter may be obtained and communicated early as the suppliers are pressing for payment.

Early orders of Government are requested.

No. 791. Dated 25.4.52

To

The Executive Engineer (D&S) II,
Electric Grid Office,
Bombay

Sub:- Time allowed for completion of work of fabrication of line materials for Fukeri and Culédoud.

Dear Sirs,

With reference to your letter No. ELG.DSII/82/10330 dated 10.4.52 we have the pleasure to inform you that we had requested for an extension of one and half month vide our letter No. 783 dated 31.3.52.

The difficulty of getting Oxygen gas cylinders still exists which has delayed the completion of V cross arms. In addition due to the winding of Blower motor of foundry being burnt that section has delayed the delivery of packing pieces.

We shall therefore request you to extend the completion period by one month more i.e. upto 31.5.52.

We hope you will realize that the delay is unavoidable due to unforeseen circumstances.

Thanking you in anticipation.

Yours faithfully,
FOR INDUS ENGINEERING CO.
Sd/- J.D.Bhagia

To

The Secretary to Government,
Public Works Department,
Bombay

Subject :- (1) Fabrication of Line materials for Rural Electrification Schemes at Guledgud.

(2) -do- at Hukeri.

The above works have been sanctioned administratively under Government Resolutions Public Works Department No. GBI.1051 dated the 12th June 1951 and GBL.1551 dated the 28th August 1951 and the same have been technically sanctioned by me vide item No. 83 for December 1951 and item 54 for September 1951 respectively. They were entrusted to Messrs. Indus Engineering Company as a result of public invitation of tenders on B2 forms of agreement which stipulated completion of the works within one month and three months respectively from the date fixed in the written order to commence the work.

The contractors were ordered to start the works under Executive Engineer (D&S) II's letter No. Elg.DS.II/82/27760 dated the 28th September 1951 but the contractor did not finish the works within the stipulated period. The contractor was however granted extention upto 30th April 1952.

The works were not completed even in the extended period. They were however finished on 19th May 1952. The contractors state that vide their letter No. 791 dated the 25th April 52 (copy enclosed) they had applied for further extension but the letter was neither received in this office nor in the office of the Executive Engineer (D&S II, the extension asked for further could not be granted. The contractors are however not proposed to be penalised under clause 2 of the contract. The delay in completion of the work is stated to be due to the difficulty experienced by them in getting Oxygen gas cylinders.

As the department has not been put to any loss and the schemes as a whole have not suffered any set back on account of

de...

delay in completion of the works I would request that the penalty leviable on the contractors under clause 2 of the contract may be condoned.

Electrification of certain towns in Bijapur District.

Government of Bombay.
Public Works Department.
Resolution No.GBI 1051.
Bombay Castle (Bombay No.1),
12th June 1951.

Government Resolution No.8993/36, dated the 21st January 1948.

Letter No.Elg.(D.& S.)II/11110, dated the 20th April 1951, from the Chief Engineer, Bombay Electric Grid. as under:-

"I forward herewith in quadruplicate detailed estimates for revised administrative approval by the Government for the electrification of Guledgud and Kamatgi Towns in Bijapur District. / with a note*

In Government Resolution No.8993/36 of 21st January 1948, Government gave administrative approval to the electrification of these towns at the following costs:-

		Guledgud Rs.	Kamatgi Rs.
Sub-estimate I:-	Power Plant etc.	2,38,400	84,820
II:-	Transmission and Distribution Lines.	45,862	88,766
III:-	Transformers, Switchgear etc.	77,038	26,414
		3,61,300	2,00,000

Joint Total : Rs.5,61,300/-.

Whereas originally separate estimates were submitted for Guledgud and Kamatgi, the estimate now submitted is for the electrification of both towns because the works pertain to one Scheme with only power house at Guledgud. Sub-estimate IV for Testing Apparatus has also now been included.

Under their letters Nos.8993/36-El(I) of 31st October 1949 and 8993/36-El(I) of 9th June 1950, Government were pleased to sanction the expenditure of Rs.3,24,772/- for power plant at Guledgud. Adding 5% for contingencies and 8% for other charges which have been adopted in the nursery schemes hitherto, the amount works out to Rs.3,68,292/-.

Under their letter No.8993/36-El(I) of 19th June 1950, Government was pleased to sanction the placing of orders for transmission and distribution line materials estimated at Rs.4,20,635/- which includes the contingencies and other charges mentioned in the previous paragraph.

The above two interim sanctions being only for materials of long delivery, the matter of the remaining items like Power House Building, land etc. were not dealt with previously.

As Government are aware, cost of building material and labour have also risen steeply. The administratively approved sanction dated 21st January 1948 allowed for Rs.63,050 for these items which have now to be revised to Rs.93,000. A new item of

Testing ..

*Printed as an accompaniment.

Testing Instruments has to be included for Rs.9,072/-, as the same was overlooked in the original proposal of 13th October 1947.

Since submitting the first revised estimates for Transmission and Distribution line materials under this office letter No.Elg.356/6530 of 12th April 1950, the price of copper, steel and rubber have shot up. The price for copper wire has been estimated 20% higher than the last year's rate contract rate for the same in the absence of a new rate contract and in view of the shortage of raw materials. For similar reasons, the rate for V.I.R. Cables has been estimated 33% higher than last year's rate contract rate.

A comparative statement of the cost of this scheme under each sub-estimate administratively approved by the Government and as now worked out is enclosed vide statement I.

The increase in interest and depreciation charges on account of higher capital cost and larger operation and maintenance charge due to:-

(a) the price of fuel oil being about Rs.250/- per ton at site against Rs.165/- per ton assumed previously in the administratively approved estimates,

and

(b) the increased charges on establishment due to increased cost of labour,

necessitate a revision; also of the Revenue Forecast on basis of which the scheme was administratively approved.

The tariff rates assumed for calculating revenue are therefore taken as those which have been sanctioned by the Government for Ratnagiri District and which are in force from 1st March 1951.

The Revenue Forecast for the first ten years worked out on the above basis is shown in statement II. It will be seen that the scheme is just self supporting in the 10th year of operation at the new tariff as the original proposal was at the old tariff.

Since both the capital cost and revenue forecast of the scheme have materially changed, revised administrative approval to the scheme is necessary, which may kindly be accorded. It is necessary to mention that in view of the frequent fluctuations in the present market conditions, the rates assumed in the estimates for materials yet to be ordered are only those as are now known and therefore to be treated as approximate".

RESOLUTION. - The plan and the revised estimate amounting to Rs.9,42,305 for the electrification of Guledgud and Kamatgi in the Bijapur District are approved administratively.

2. Expenditure on the scheme during the current year should not exceed the sanctioned grant of Rs.3,10,000 for it under the head "81-A Capital Outlay on Electricity

Schemes ....

'Schemes - Post War Reconstruction and Development Programme".

By order of the Governor of Bombay,

K.V.Joglekar,
Deputy Secretary to Government.

To

The Finance Department.
The ~~Reconstruction~~ Public Works Department.
The Revenue Department.
The Local Self Government and Public Health Department
The Collector of Bijapur.

The Executive Engineer, Southern Electrical Division.
The Accountant General, Bombay.

No. of 1951.

Copy forwarded for information and guidance to -

Accompaniment to Government Resolution, Public Works Department, No.GBI 1051, dated the 12th June 1951.

...

Proposed Diesel Nursery Scheme for the Towns of Guledgud and Kamatgi in Bijapur District.

1) Features of Town:-

Guledgud:- Guledgud is situated in Badami Taluka. The nearest Railway Station is Guledgud Road, 7 miles off Guledgud. There is an all weather road connecting Guledgud and Guledgud Road. The total area covered by the town of Guledgud is 0.35 square miles.

Kamatgi:- Kamatgi is situated in Hungund Taluka. The nearest Railway Station is Bagalkot, 15 miles off Kamatgi. There is a Public Works Department road connecting Kamatgi and Bagalkot. The total area covered by the town is about 0.2 ~~square~~ square miles.

2) Porulation:-

Guledgud:- The population of Guledgud was 18,307 in 1941.

Kamatgi:- The population of Kamatgi was 6,995 in 1941.

3) Scope of Electrical Development:-

As a part of the first stage of electrical development under the post war reconstruction schemes in the State, Government have approved the electrification of these two towns. This proposal provides for the installation of a power station at Guledgud with the necessary equipment for generating electricity at 400/440 volts, 50 cycles A.C. and stepping up this voltage to 11 kV., transmission to the transformer substations at 11 kV. and distribution for domestic, industrial and street lighting purposes in the important parts of the towns at 400/230 volts.

Details ....

Details of the Scheme are as under:-

(a) Power House:- The land necessary for the building of the power station and laying out the necessary auxiliaries and the machinery to be installed inside the building will be as shown in Drawing No.DS.II/195 enclosed.

(b) Generation:- In the initial stage, one diesel engine alternator of 200 kW. and two of 100 kW. each will be installed with the necessary auxiliaries. With the growth of load it is proposed to instal an additional set when necessary later. Though the cost of this extension is not provided in this estimate, the design of the power station building has been made so as to accommodate the fourth set.

(c) Outdoor step up sub-station:- The voltage is stepped up to 11000 volts by the installation of two numbers of 150 kVA transformers; 420/11000 volts in the power house compound.

(d) Transmission:- From the step up substation in the power house, one 11 kV. feeder is taken along the main road to feed transformer substations in the load centres at Guledgud and Kamatgi. The feeder will be run on rail poles, 60/50 lbs. section. The conductors will be of 6 S.W.G. copper

(e) Distribution:- The pole mounted outdoor transformer substations will be one of 75 kVA. at Kamatgi and 2 of 50 kVA. at Guledgud. From each of these substations a three phase 4 wire distribution will be taken over the important streets of the town to feed industrial and domestic consumers. The distribution lines will be taken wherever possible on the same poles carrying 11 kV. and singly along routes where no H.T. line is taken. Copper conductors of different sizes suitable for giving proper voltage regulation on the different feeders will be used. A separate phase wire from the power house and each substation is provided for street light conductors; the operation of which will be controlled at the power house and sub-stations. Guarding between H.T. and L.T. lines and L.T. lines and the ground is to be provided.

(f) Service connections:- On a moderate estimate it is anticipated that 754 domestic consumers, 32 industrial loads and 255 street lights will be connected up during the first five years of operation. This includes the cost to the Government on such connections.

(g) Testing Apparatus:- The estimate includes the provision of necessary workshop and other tools for the power station and transmission and distribution lines and also the important instruments required for the operation and maintenance of the installations.

No.ELG/(D&S)II/82/1048
Electric Grid Offices,
Mercantile Bank Building, Fort,
Bombay 1: 12th January 1952.

To
Messrs. Western Iron Works Co.Ltd.,
Below Mahalaxmi Bridge,
Bombay 11.

Subject: Fabrication of L.T.switchboards for Hukeri and Guledgud schemes.

Reference: Your letter No.E.2/883 dated 28th November 1951.

Dear Sirs,

In continuation of this office letter No.ELG(D&S)II.82/28454 dated 5th October 1951 and with reference to your above letter, I have to inform you as under:-

1. The sample switchboard fabricated by you is found to be as per our requirements and therefore, is approved.

2. You are hereby instructed to fabricate and assemble remaining six switchboards for Hukeri and four switchboards for Guledgud including the supply of Voltmeter 5 point switches as per quotations and conditions of tender, submitted by you.

3. Please inform this office on completion of fabrication and assembly of each switchboard to enable this department to depute an officer for inspection.

4. It should be dismentled, numbered and packed only after the same is inspected and passed.

5. Disposition of iron clad switches, meters and instruments etc will be instructed personally by Assistant Engineer Shri Shukla.

6. Please acknowledge the receipt and acceptance of this order and confirm that you have taken necessary steps for compliance.

Yours faithfully,

Sd/- 12.1.

Executive Engineer (Diesel & Steam)

True copy.

51

No. Elg/DS II/82/22323
Electric Grid Offices,
Mercantile Bank Building, Fort,
Bombay 1. 29th July, 1952.

To

The Secretary to Government,
Public Works Department,
Bombay.

Subject:- Fabrication of L.T.Switch Boards at Guledgud estimated to cost Rs. 2,400/-.

The above work was administratively approved under G.R., P.W.D., No. GBI-1051 dated 12-6-1951 and technically sanctioned vide item No. 88 for 12/51.

The tenders were publicly invited for the fabrication work at Hukeri and the work as a result thereof was entrusted to Messrs. Western Iron Works Co. Ltd. As per one of the additional conditions attached to the tender the successful tenderer might also have to be given the fabrication work at Guledgud at the same rates as were obtained at Hukeri.

According the work at Guledgud was entrusted to Messrs. Western Iron Works Co. Ltd. under Executive Engineer (Diesel and Steam)II's letter No. Elg.D&S.II/82/1048 dated 12-1-1952 (copy attached) without covering it separately by a formal agreement on suitable P.W.D. form of agreement.

The whole work is since reported to have been finished on 12-5-1952 on the basis of rates sanctioned for the work at Hukeri on the assumption that no separate agreement was required to cover the work at Guledgud. If it be taken that the work of Guledgud became part of the main tender for the work at Hukeri, in the above circumstances, I am afraid, by doing so the works of 2 separate estimates would be covered by one single agreement in contravention of para 340(c) of P.W.D. Manual Volume I and the delay in completion of the work would also need to be condoned and no penalty under clause 2 of the agreement levied on the contractors, for the same reasons as are contained in my letter No. Elg\DS II/82/22322 dated 28-7-52 regarding waiving of penalty leviable for delay in completion of fabrication work at Hukeri.

I would, therefore, request that Government may be moved to condone the irregularity of getting this work done on the basis of rates settled for the work at Hukeri without entering into separate formal agreement, at this stage when the work is already finished.

As the liability is already incurred and the contractors are pressing for payment, I am arranging to pay their bill withholding about Rs. 300/-. I would, therefore, request you kindly to approve my action of paying the contractors on the basis of rates settled for similar work at Hukeri.

Encl- and copy of letter.

Chief Engineer.

To
The Chief Engineer,
Bombay Electric Grid,
Bombay (I).

SIR,

Sub: Diesel Electric Plant and machinery for power stations at Dharnagaon, Hukeri, Gudedgud Ilkal and Bailhongal - payment of bills for the...

I am to state that 50% payment of the F.O.R. contract value is being made to M/s. Turner, Hoare and Company Ltd., Bombay, for the supply of machinery at various power houses in accordance with the orders issued by Govt. in their letter No.GBI 1052 K dated 25-7-52. The machinery is stored in the contractor's godown till they are carried out to the site of work. In this connection, I am to point out that similar arrangement was made in case of M/s. Atlas Engineering Company who fraudulently disposed of the material involving Govt. into a heavy financial loss. I therefore, request you to reconsider the desirability of allowing the materials worth several lacs of rupees to lie in the contractors godown as it may involve govt. into further financial loss.

Ref:- Your No. PW VI/EG/2212 of 11.2.1953. P.63

With reference to above I have to state as under since the issue of Government orders sanctioning 50% payment to M/s T.H. & Co. Ltd, concerning machinery stored in their godown for the five Power Stations mentioned above, machinery for Guledgud and Hukeri has been despatched to sites and 80% payment made.

Instructions to despatch machinery for Dharangaon and Ilkal Power Stations are already issued and it is expected that same will go to sites in next month or so.

Machinery for Bailnongal involving Rs. 34706/- paid , will have to be stored for some more time at Bombay in the contractor's godown.

As there was no storing space available either at Head Office or at sites the above procedure had to be adopted.

It is felt that firms of M/s T.H. & Co.'s standing will not take to fraudlant ways and any such attempts will not usually pass unnoticed by this office in view of the heavy nature of the machinery

Pl. see A.E. B'bay's letter at p.63 and addressed to the C.E., B.E.g. The C.E. has explained ~~the~~ ~~position~~ circumstances in his letter at p. 67 and the circumstances under which the machinery was req'd. to be left in the contractor's godowns. In view of the last two paras of the C.E's letter p 67 it appears that no financial loss to govt. will be involved in this case. No further action seems necy. in the matter.
